

# Q & A

## Q: Who can undergo the BEYOND® award winning Power Whitening treatment?

A: BEYOND® produces dramatic whitening results for any patient who wants to whiten his or her teeth. The treatment is most effective on patients with extrinsic stains caused by food, drinks, or tobacco products. However it is also an effective treatment for teeth with intrinsic tetracycline, fluoride, and age-related stains.

## Q: Will it whiten my existing crowns or veneers?

A: Whitening treatments can only whiten natural teeth and cannot change the color of porcelain crowns, veneers, or composite fillings.

## Q: How white will my teeth be after the treatment?

A: Whitening results can vary depending on the severity and nature of your stains. Your BEYOND® treatment will be tailored to produce the best whitening results possible. Talking to your dentist about your expectations from the treatment will assist him or her in designing an appropriate whitening schedule to meet your individual needs.

## Q: How long should I expect my whitening results to last?

A: This varies from person to person and depends on your diet and lifestyle, but the effects usually last for about two years. Periodic touch-up treatments are recommended for patients who consume coffee or other staining foods and drinks frequently or who use tobacco products.

## Q: How long does the treatment take with BEYOND®?

A: For most whitening cases, the BEYOND® Power Whitening treatment is 30 minutes long. Treatment times may vary depending on your individual whitening needs.

## Q: Is it safe?

A: Yes, the BEYOND® award winning Power Whitening treatment is 100% safe. The BEYOND® II Whitening Accelerator uses and innovative LED technology and advanced light filtration system that removes all harmful heat exposure, ensuring your comfort and safety and reducing the risk of your experiencing sensitivity during or after the treatment.

## Q: After the treatment, how do I care for my whiter smile?

A: For the first 24 hours after the BEYOND® treatment, a "white diet" is recommended. You should avoid using tobacco products and consuming coffee, tea, cola, red wine and other dark-colored foods and drinks. Avoiding using colored mouthwashes or toothpastes is also recommended.
